

# 2019 Parker County Peach Festival Electricity Guidelines

Please read and sign this contract stating that you will abide and pay for electricity you are requesting. Please do not request electricity unless necessary as it is highly limited. **Generators are not allowed.** This form must accompany application. The 220 Volt power is not interchangeable with the 120 Volt power so please request the proper electrical plug. Each vendor is required to provide a 100-ft. heavy duty extension cord. A copy of this form will be given to the on-duty electrician. If you try to access power source that you did not purchase, you will be disconnected. Form to be included in vendor packet.

**120 Volt Power:**

Each outlet provided will accommodate 16 amps total.

- 2 Refrigerators requiring 8 amps each will be 16 amps total.
- 3 bun warmers pulling 5 amps each will be 15 amps total.

You will not be allowed to plug cords into each other to make it long enough.

**Amperage:**

You CANNOT total over 16 amps per plug. Most appliances are labeled on the back to show the amperage usage. It is your responsibility to know this before you set up at the festival and you must request the correct number of receptacles in advance.

**220 Volt Power: (50 amps)**

You must provide at least a 50-foot power cord. You will not be allowed to plug cords into each other to make it long enough. The Fire Marshall will disconnect the morning of the festival if you do not comply with this statement.

I need \_\_\_\_\_ receptacles of 120 Volt Power (\$30 each) = Total \$ \_\_\_\_\_

I need \_\_\_\_\_ receptacles of 220 Volt Power (\$40 each) = Total \$ \_\_\_\_\_

Please list all appliances that you intend to use during the festival so that we may verify your voltage needs:

Appliance:	Amps:	Appliance	Amps:

I have read and understand the electrical guidelines and will abide with the terms.
